

Expandable Team Registration

If you have a team event with a fixed fee for a minimum / maximum number of participants. Race Directors should set the team submission to be expandable.

For Example - You have a team option where the captain enters a minimum of 2 and up to a maximum of 4 participants and you pay \$100 for the registration. This allows team captains to add or edit their team registration from their athlete dashboard, and saves you administrative time performing updates and additions for captains.
